

**AMENDMENTS TO THE CLAIMS**

1. (previously presented) A photosensitizer carrier composition comprising:
  - (a) one or more photosensitizer and
  - (b) one or more block copolymer which, when in liquid form, is capable of forming a complex with said photosensitizer and wherein said copolymer is i) not an amphiphilic polymer of polystyrene sodium sulphonate and vinyl naphthalene, and ii) not poloxamer 188;wherein said photosensitizer carrier composition, which is formed from said complex, is in a solid form.
- 2-6. (canceled)
7. (currently amended) The composition of claim 1, wherein said complex, when the block copolymer is in liquid form, is selected from the group consisting of a micelle[[s]], an emulsion[[s]], a gel[[s]], or a matrix ~~or transition phases between the preceding defined states.~~
8. (original) The composition of claim 1, wherein said block copolymer comprises polyoxyethylene and polyoxypropylene; polytetrahydrofuran; or polyaspartic acid.
9. (original) The composition of claim 8, wherein said polyoxyethylene-polyoxypropylene block copolymer is selected from the group consisting of poloxamer 403 (P123), poloxamer 407 (F127), poloxamer 402 (L122), poloxamer 181 (L61), poloxamer 401 (L121), poloxamer 185 (P65), and poloxamer 338 (F108).
10. (original) The composition of claim 1, wherein said photosensitizer is selected from the group consisting of porphyrins, pyrroles, tetrapyrrolic compounds, expanded pyrrolic macrocycles and their derivatives.
11. (original) The composition of claim 10, wherein said porphyrin derivative is selected from the group consisting of green porphyrins, tetrahydrochlorins, pyrophenophorphides, purpurins,

texaphyrins, phenothiaziniums, phthalocyanines, naphthalocyanines, porphycenes and pheophorbides.

12. (original) The composition of claim 11, wherein said tetrahydrochlorins are selected from the group consisting of chlorins, hydroxychlorins, bacteriochlorins, and isobacteriochlorins.

13. (previously presented) The composition of claim 11, wherein said green porphyrin is a benzoporphyrin derivative (BPD).

14. (previously presented) The composition of claim 13, wherein said BPD is selected from the group consisting of benzoporphyrin derivative monoacid ring A (BPD-MA), benzoporphyrin derivative monoacid ring B (BPD-MB), A-EA6, B-EA6, A-B3 and B-B3.

15-17. (canceled)

18. (currently amended) A photosensitizer carrier composition comprising a photosensitizer, poloxamer 188 (F68) and an emulsion forming agent, wherein said agent is not a fluorocarbon selected from the group consisting of FC43, PP11, and PP25.

19. (canceled)

20. (canceled)

21. (previously presented) A solid support on which said composition of claim 1 or a hydrated form of the composition is deposited.
